SUMMARY

Frontend engineer with 4 years of experience specializing in React and Vue ecosystems. Expert in building responsive, component-driven UIs with React Hooks, Redux state management, and Vue 3 Composition API. Proven track record in optimizing web performance, implementing comprehensive testing strategies with Jest and React Testing Library, and architecting scalable frontend solutions that drive measurable business outcomes.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3/SASS

React Ecosystem: React Hooks, Redux Toolkit, React Router, Vitest, Material UI, Tailwind CSS

Vue Ecosystem: Vue 3 Composition API, Pinia, Vue Router, Vitest

Tools: Git, Github, Husky, SonarQube, Docker, VS Code, Visual Studio

Backend: .NET 8, GraphQL, REST APIs, MySQL

EXPERIENCE

Senior Software Engineer

Oct 2024 – Present

Mirastra Technologies

Bangalore, India

- Architected Vue 3 frontend using Composition API and Pinia for state management, building reusable component library and achieving seamless integration with GraphQL and REST endpoints
- Optimized component rendering and implemented code-splitting with Vite, reducing initial bundle size by 40% and improving Time to Interactive by 35%
- Developed comprehensive Vitest test suites for Vue components with 85%+ coverage, ensuring robust component behavior and preventing regressions
- Designed and implemented MySQL database schema and .NET 8 backend services to support frontend data requirements

Software Engineer

May 2023 – Sep 2024

Peerbits Solution Private Limited

Ahmedabad, Gujarat

- Engineered React-based multi-tenant SaaS CRM platform with Redux-Toolkit for complex state management across quotation, sales, and lead management modules
- Implemented dynamic role-based access control (RBAC) UI with React Router guards, enabling granular permission management and custom role creation for enterprise clients
- Optimized React component performance using React.memo, useMemo, and useCallback hooks, reducing unnecessary re-renders by 60% and improving application responsiveness
- Built comprehensive Vitest test suites achieving 75% coverage, implementing unit tests for components, integration tests for user flows, and custom hooks testing
- Developed custom React hooks for form validation, API data fetching, and authentication state management, promoting code reusability across 50+ components
- Reduced page load times by 15% through implementing lazy loading, code-splitting, image optimization, and strategic component bundling with Webpack
- Integrated Husky pre-commit hooks to enforce ESLint rules and automated testing, reducing faulty commits by 80%

Associate Software Engineer

Sep 2021 – May 2023

Accenture Solution Private Limited

Pune, Maharashtra

- Contributed to microfrontend architecture migration to monorepo, streamlining React component sharing and reducing build times by 25%
- Implemented React components with Hooks (useState, useEffect, useContext) and integrated them into Angular application using Web Components, ensuring seamless cross-framework communication
- Collaborated with UX team to implement responsive designs using CSS Grid, Flexbox, and media queries, ensuring consistent user experience across devices

KEY PROJECTS

Target Definition Manager (TARDEM) <i>Vue 3, Pinia, .NET 8, MySQL</i> - Built full-stack project management platform with Vue 3 Composition API, implementing complex reactive forms for metric template creation and project planning - Developed role-based review workflow UI with real-time email notifications, approval chains, and version history visualization using Vue components - Implemented comprehensive audit trail interface displaying all project changes, versions, and metric data with interactive charts	Jan 2025 – Jun 2025
Multi Task Web Panel (CRM Platform) <i>React, TypeScript, Redux-Toolkit, React Router, Vitest, Formik, Material UI, Tailwind CSS</i> - Developed quotation and sales module frontend with React, enabling real-time quote creation, management, and tracking with dynamic pricing calculations - Built interactive dashboard with React Charts for sales analytics, lead conversion funnels, and performance metrics visualization - Implemented complex form handling using Formik and Yup for multi-step quotation workflow, reducing form submission errors by 70%	May 2023 – Sep 2024
Multi Task Admin Panel <i>React, TypeScript, Redux-Toolkit, Formik, React Router, Material UI, Tailwind CSS</i> - Created lead management system UI with drag-and-drop using React DnD, enabling intuitive lead stage transitions - Developed custom React components for quotation builder with module selection, pricing configuration, and PDF export functionality - Implemented TypeScript throughout the application, reducing runtime errors by 45% and improving developer experience with type safety	Feb 2024 – Sep 2024

EDUCATION

G H Patel College of Engineering & Technology <i>Bachelor of Engineering in Information Technology</i>	Aug 2017 – May 2021 <i>CGPA: 8.89/10</i>
--	---

KEY ACHIEVEMENTS

Performance Optimization: Reduced bundle size by 40%, page load times by 15%, and improved Time to Interactive by 35%
Testing Excellence: Maintained 75-85% test coverage with comprehensive Jest and React Testing Library test suites
